We can see waste(浪费)everywhere in the school. Some students ask for more food than they can eat and others often forget to turn off the lights when they leave the classroom. They say they can afford（负担得起）these things. But I don't agree with them.

Waste can bring a lot of problems. China is short of many things, for example, fresh water. And maybe we will have no coal or oil to use in 100 years. So if we continue wasting things, what can we use in the future and where can we move? Think about it. I think we should say no to the students when they waste things. Everybody should stop wasting .

In our daily life，we can do many things to stop waste. For example，turn off the water taps when we finish washing, turn off the lights when we leave the classroom，try not to order more food than we need，and so on. Little by little，everything will change. If we do our best, we can stop waste one day.
