My family has had a great influence on me. When I was a kid, I learnt how to work from my family. My mom would never let me get away when there was something to be done. I learnt the importance of education. My parents would give me 50 dollars if I got A's in school. They taught me how to use and save money. My mom taught me how to cook, how to clean, and basically everything I needed to know to live on my own. My dad taught me how to garden, how to do home improvement, how to treat women and girls with respect, and how to put other people's needs above my own. My brothers and sisters taught me how to make a decision in conflict (矛盾). I'm 22 now, and I'll get married next year. I learn things from my parents' marriage by examples. For example, I've never seen my parents really fight. They had disagreements, but they were always in control and never let anger get the best of them. I think that's great, and I'm going to work towards that in my marriage.

I have a great family. I'm grateful my parents chose to make it a great family.

Do you know why different animals or pests have their special colors? Colors in them seem to be used mainly to protect themselves. Some birds love eating locusts (蝗虫), but birds cannot easily catch them, why?

It is because locusts change their colors with the change of the colors of crops. When crops are green, locusts look green. But as the harvest (收获) time comes, locusts change to the same brown color as crops have. Some other pests with different colors from plants are easily found and eaten by others. So they have to hide themselves for living and appear only at night.

If you study animals' life, you'll find the main use of color is to protect themselves. Bears, lions and other animals move quietly through the forests and they cannot be easily seen by hunters. This is because they have the colors much like the trees.

Have you ever noticed an even stranger act? A kind of fish in the sea can send out a kind of very black liquid (液体) when it faces danger. While the liquid spreads, its enemies cannot find it. And it immediately swims away. So it has lived up to now though it is not strong at all.

All families are different, and all families have their own lifestyles. But with the right amount of work and determination (决心), you can make your family life the best, by developing your relationships and learning more about yourself and your relatives, so why not?

Understand your family well. If you don't understand your family, there can be many misunderstandings (误解) and fights. Be with them whenever you can and get to know them better. A lot of families now don't get to know each other too well because they're too busy. Plan some family time, like a movie, or a family game, or even as little as eating dinner together.

Respect your family. Your children and your wife / husband are now yours but remember at the end of the day they are also humans. They also have opinions or suggestions. Sometimes they can be bad or good. Never be angry with someone's opinion. They have their opinions, and no one is perfect. No one wants to be ignored just for some meeting or work. Give time to each so you can understand every person properly and this can help you get along well with each other.

Help each other. When you see your family members need help, help them. Do little things such as holding the door for them, or helping someone with housework.
